## Design Guidelines:

1. Consistent Branding: Utilize the primary brand color across buttons and interactive elements to maintain visual uniformity throughout the portfolio.
2. Spacing Standards: Implement a systematic spacing approach to ensure consistent margins, paddings, and spacing between components, promoting a clean layout.
3. Grid Alignment: Apply a 12-column grid framework to achieve structural balance and responsiveness across various screen dimensions.
4. Typography Hierarchy:
  - H1: Designate for main headings.
  - H2: Use for section subheadings.
  - Body Text: Reserve for detailed and descriptive content.
5. Accessibility Considerations: Ensure sufficient contrast between text and background to enhance readability for all audiences, prioritizing inclusivity.
6. Interactive Prototypes: Create interactive prototypes to enable smooth transitions and navigation across pages, delivering an intuitive user experience.

## About Me

I am Biruk Ayalew, a passionate and skilled web developer with a knack for creating visually appealing and user-friendly websites. My journey in web development has been fueled by curiosity, a love for learning, and the goal to bring ideas to life. Whether crafting a complex backend or designing intuitive user interfaces, I approach every project with creativity and precision.

II 0:06 / 3:45 ⏸ 🔍 ⏮

## My Hobbies

### Nature and Hiking

Wandering through serene mountain trails and breathing in the crisp air of the wilderness fills me with peace and inspiration. It's where I reconnect with nature and recharge my spirit.

### Photography

Every click of the camera is an opportunity to freeze time and tell a story. Whether it's a breathtaking landscape or a fleeting candid moment, photography lets me see the world through a different lens.

### Chess

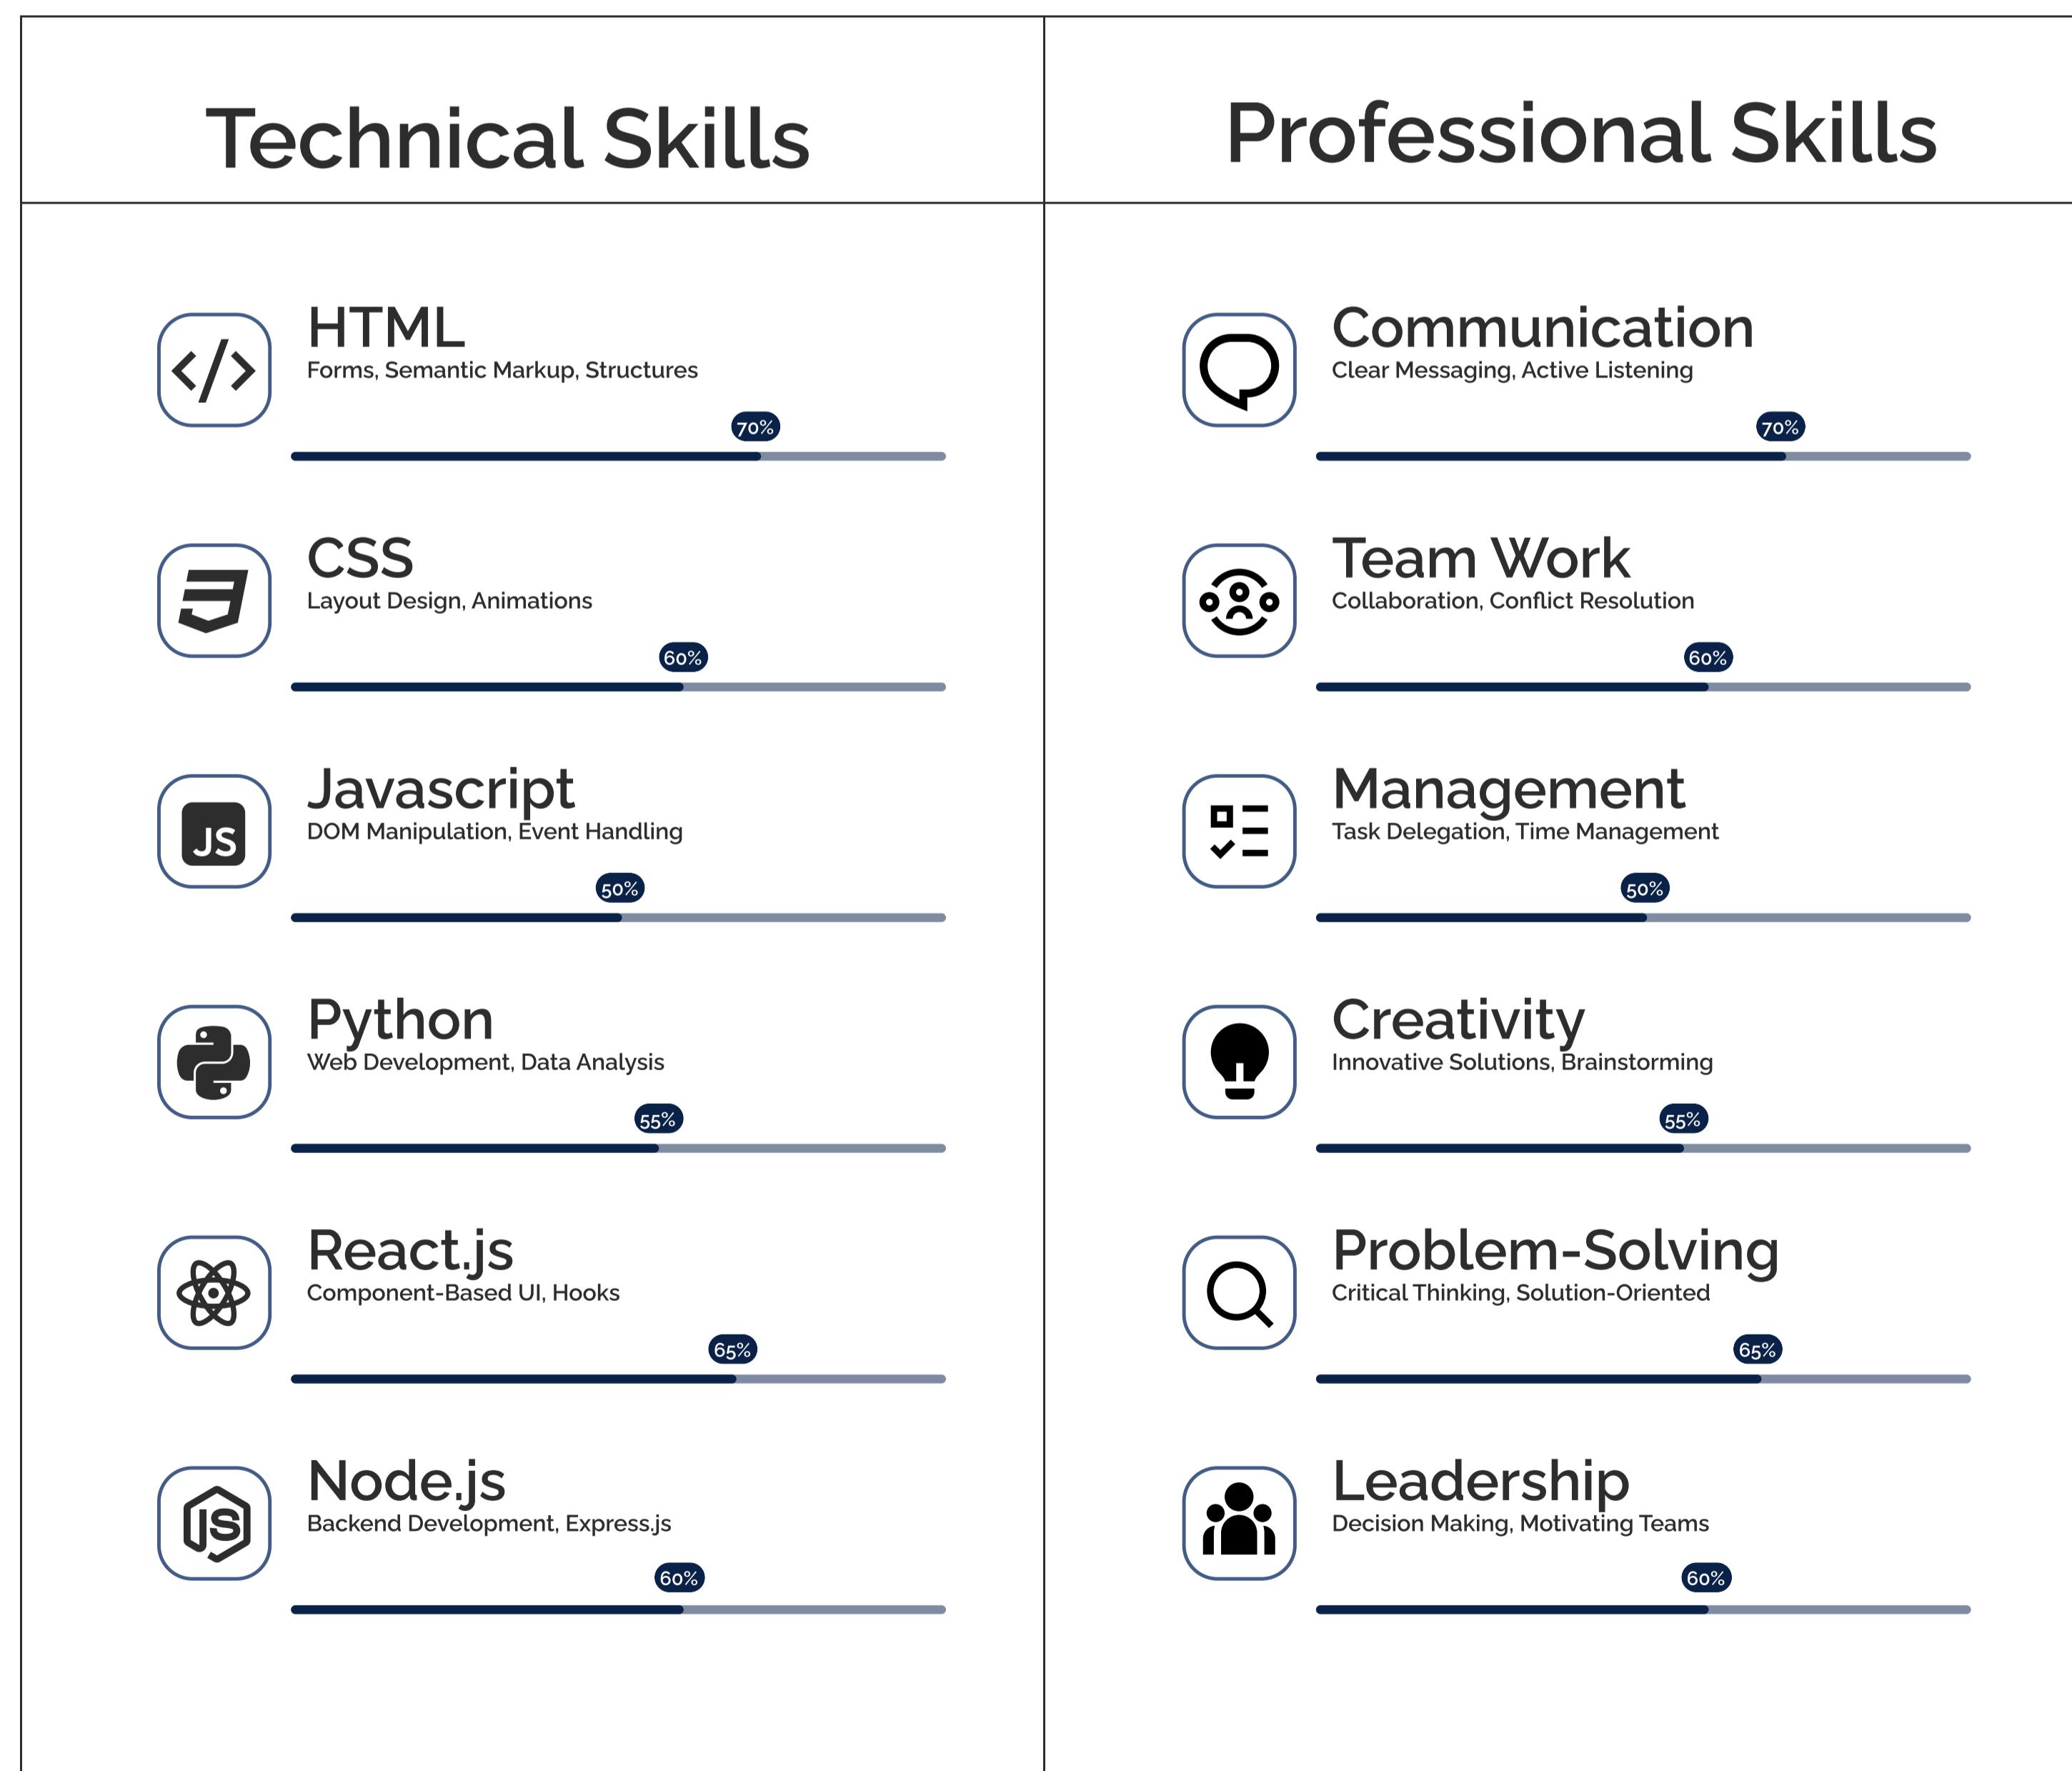

Engaging in a game of chess isn't just a pastime; it's a mental workout. I enjoy the challenge of coordinating, thinking ahead, and finding creative ways to outmaneuver my opponent.

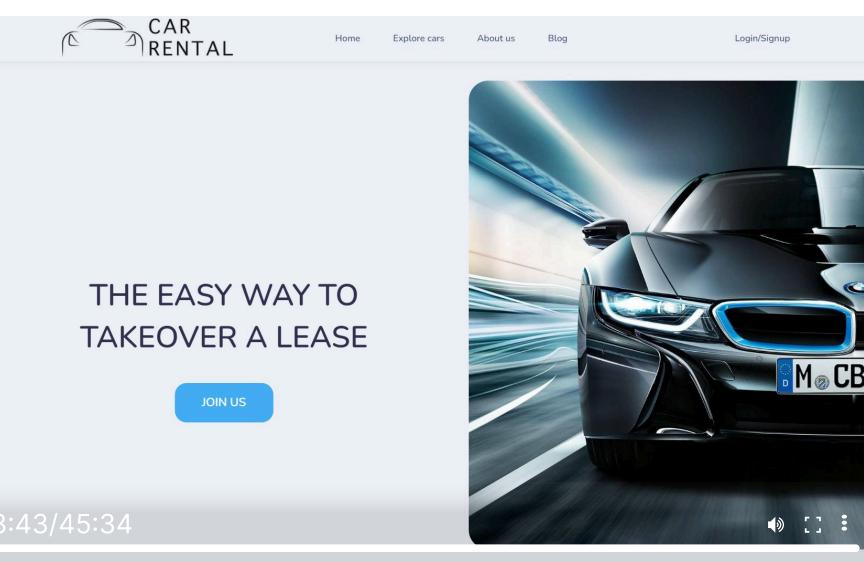

### Programming Exploration

Diving into new programming languages feels like uncovering hidden treasures. I relish the thrill of learning fresh concepts, solving complex problems, and expanding my toolkit as a developer.

## Skills

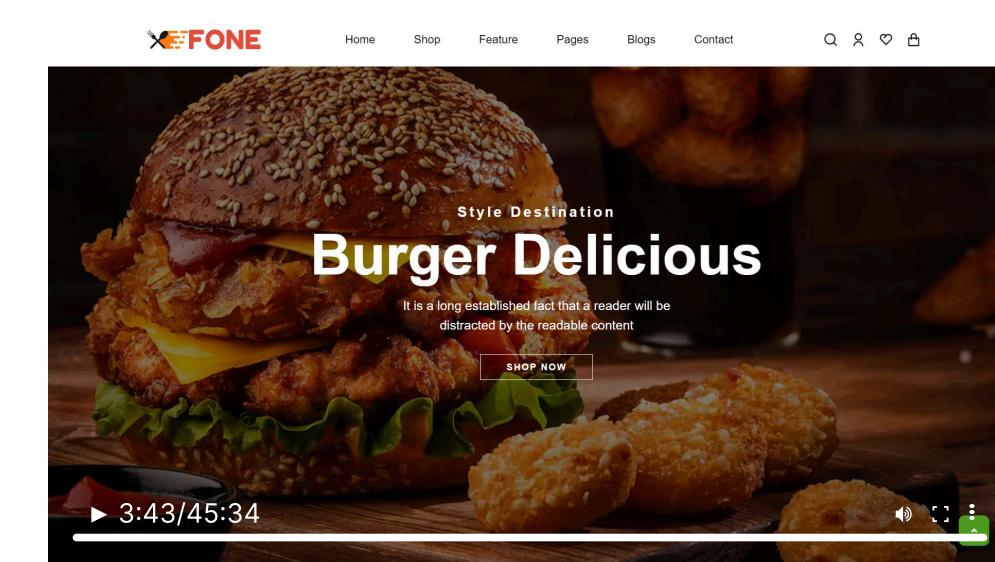

# My Projects

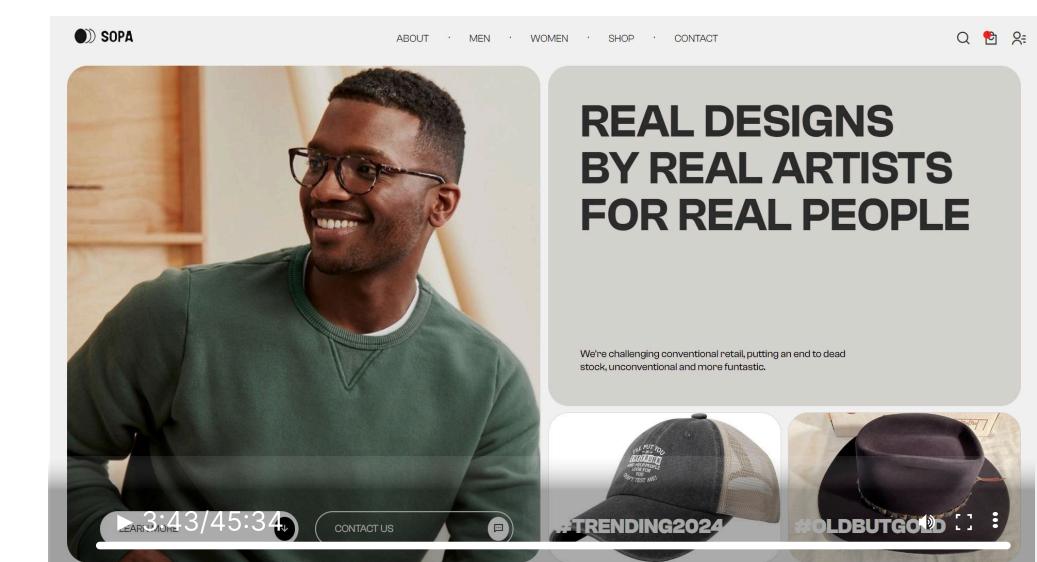

## [Car Rental Website →](#)

My team and I developed a full-stack project, building a robust backend and integrating the frontend from a pre-designed landing page. We added additional pages, ensuring full functionality and alignment with the original design through smooth API integration and attention to both backend logic and user experience.

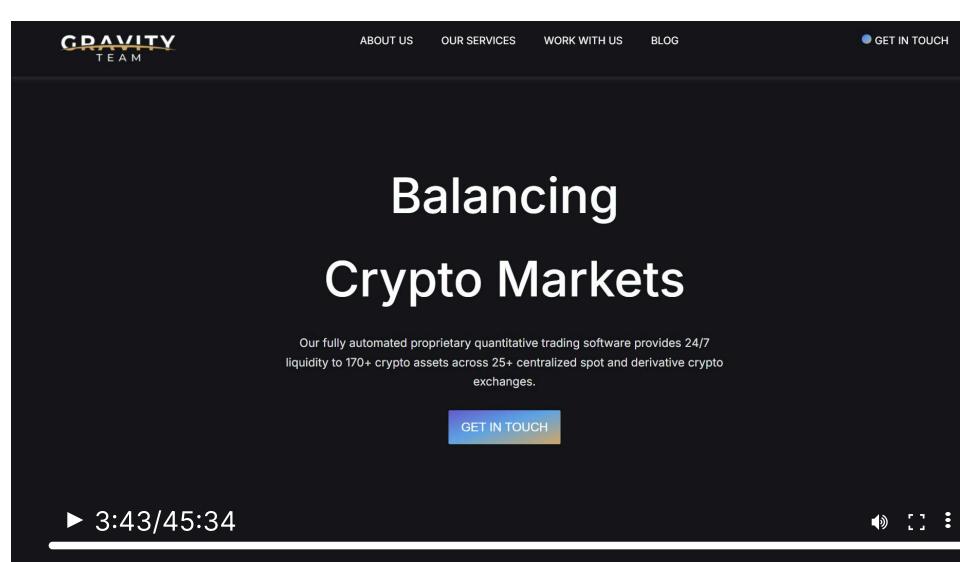

## [Responsive Restaurant Website →](#)

In this project, I implemented a fully responsive website design inspired by a design on YouTube, adding my own custom features and adjustments. The project showcases proficiency in modern web technologies, including HTML5, CSS3, and JavaScript, with an emphasis on layout techniques like Flexbox and Grid.

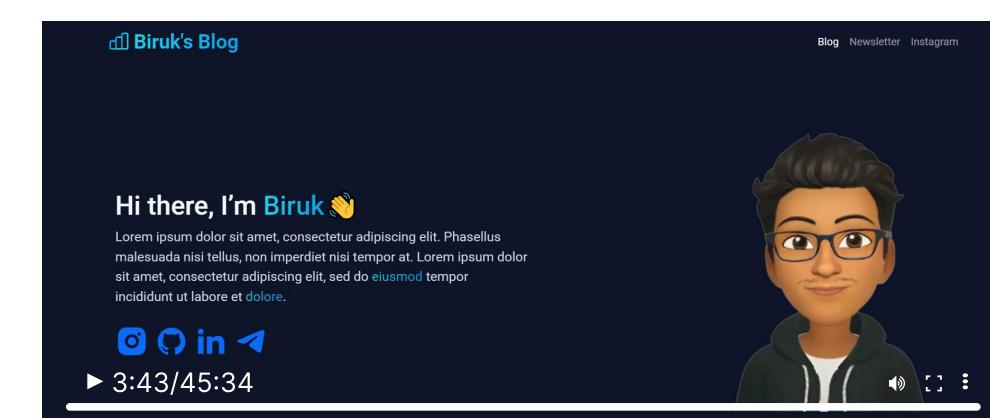

## [Sopa Clothes | E-commerce website →](#)

Developed a custom coded, fully responsive E-commerce website based on a design from Dribbble.

## [Gravity Crypto Website →](#)

This responsive website was designed from a figma design. I paid close attention to the design details and incorporated animations to highlight my UI skills.

## [Responsive Personal Blog Website using Bootstrap →](#)

This blog landing page is inspired by a community design on Figma, with the majority of the layout built using the Bootstrap framework. I enhanced the design further with custom CSS for additional styling improvements and to add a personal touch.
